

Docket No. AT9-98-916

ABSTRACT OF THE DISCLOSURE**5 METHOD AND APPARATUS FOR AUTOMOTIVE RADIO TIME SHIFTING
PERSONALIZED TO MULTIPLE DRIVERS**

A plurality of users each selects desired listening
10 broadcast programs that are recorded by a system in a
memory and indexed to the specific user. The user may
also select the desired playback schedule and playback
format. Conveniently, the system retrieves recorded
broadcast programs stored in memory, then plays them
15 according to the specific user's desired format and
schedule. Additionally, each user may select which
broadcast programs are stored, which broadcast
frequencies are scanned by the system for the desired
broadcast programs, and how long each broadcast program
20 is stored in memory.
